

Initial Hypertext Transfer Protocol (HTTP) Method Registrations

Abstract

This document registers those Hypertext Transfer Protocol (HTTP) methods that have been defined in RFCs before the IANA HTTP Method Registry was established.

Status of This Memo

This document is not an Internet Standards Track specification; it is published for informational purposes.

This document is a product of the Internet Engineering Task Force (IETF). It represents the consensus of the IETF community. It has received public review and has been approved for publication by the Internet Engineering Steering Group (IESG). Not all documents approved by the IESG are a candidate for any level of Internet Standard; see [Section 2 of RFC 5741](#).

1. Introduction

This document registers those Hypertext Transfer Protocol (HTTP) methods that have been defined in RFCs other than [RFC7231] before the IANA HTTP Method Registry was established.

2. Security Considerations

There are no security considerations related to the registration itself.

Security considerations applicable to the individual HTTP methods ought to be discussed in the specifications that define them.

3. IANA Considerations

The table below provides registrations of HTTP method names that have been added to the IANA "Hypertext Transfer Protocol (HTTP) Method Registry" at <<http://www.iana.org/assignments/http-methods>> (see Section 8.1 of [RFC7231]).
