1. Introduction

The Internet Open Trading Protocol (IOTP), Version 1.0, is specified in [RFC 2801, 2802, 2803]. It provides a payment system independent framework for Internet commerce oriented to consumer to business transactions. It provides mechanism for different portions of the business function, such as fulfillment or payment handling, to be distributed or outsourced. It does not require a prior relationship between the consumer and business.

Several errors have been noted in the IOTP v1.0 specification, particularly [RFC 2801](#), which was the largest RFC ever issued. These are listed, with their fix, in this document.

2. DTD Errata

2.1 PackagedContent Element

Attribute types are swapped.

OLD/INCORRECT:

```
!ELEMENT PackagedContent (#PCDATA) >
<!ATTLIST PackagedContent
    Name          CDATA          #IMPLIED
    Content        NMTOKEN       "PCDATA"
    Transform      (NONE|BASE64) "NONE" >
```

NEW/CORRECT:

```
<!ELEMENT PackagedContent (#PCDATA) >
<!ATTLIST PackagedContent
    Name          NMTOKEN       #IMPLIED
    Content        CDATA        "PCDATA"
    Transform      (NONE|BASE64) "NONE" >
```

2.2 The Element called Attribute

Incorrect element content specification syntax.

OLD/INCORRECT:

```
<!ELEMENT Attribute ( ANY ) >
<!ATTLIST Attribute
    type                NMTOKEN                #REQUIRED
    critical            ( true | false )        #REQUIRED
>
```

NEW/CORRECT

```
<!ELEMENT Attribute ANY >
<!ATTLIST Attribute
    type                NMTOKEN                #REQUIRED
    critical            ( true | false )        #REQUIRED
>
```

3. Other Errata

3.1 Re: Combining Authentication Transactions with other Transactions

Section 9.1.13. page 234, restarted->continued:

OLD/INCORRECT:

if the Authentication transaction is successful, then the original
IOTP Transaction is restarted

NEW/CORRECT:

if the Authentication transaction is successful, then the original
IOTP Transaction is continued

3.2 Type attribute of Element called Attribute

Section 7.19.1, Page 150, insufficient list of signature types:

OLD/INCORRECT:

There must be one and only one Attribute Element that contains a
Type attribute with a value of IOTP Signature Type and with
content set to either: OfferResponse, PaymentResponse,
DeliveryResponse, AuthenticationRequest, AuthenticationResponse,
PingReq or PingResponse; depending on the type of the signature.

NEW/CORRECT:

There must be one and only one Attribute Element that contains a Type attribute with a value of IOTP Signature Type and with content set to either: OfferResponse, PaymentResponse, DeliveryResponse, AuthenticationRequest, AuthenticationResponse, PingReq, PingResponse, AuthenticationStatus, InquiryRequest, or InquiryResponse; depending on the type of the signature.

AND a similar change extending the list of values in [Section 12.1](#), Page 262.

And at [Section 6.1.2](#), Page 82, add the following:

AuthenticationStatus	any role
InquiryRequest	any role
InquiryResponse	any role

4. Security Considerations

The errata listed herein are not particularly security related. Never the less, incorrect implementations due to uncorrected errors in the specification may compromise security.
